

THE LATEST GENERATION MULTI-CHANNEL LOW PROFILE PCIe SOUND CARD

ALP442e is the versatile multichannel PCIe sound card for professional PC-based audio systems running under Windows and Linux environments. This card is ready for any challenge. The low profile, reliable and stable ALP442e is ideally suited for mission critical applications where audio is key - broadcast, utility, public safety or transportation markets.

ALP442e offers four balanced analog line inputs plus two stereo AES3 inputs, four balanced analog outputs plus two AES3 output, and 8 GPIs / 8 GPOs. The on-board zero latency mixer features 16 I/O channels (4 analog, 4 AES3, 8 software play/record). Each of the 16 output channels has its own mix from the 16 inputs.
